Project Title

## ECO-NETWORKING - Community-building for ecologically, socially and sustainability-politically interested and committed young people

Organisation	Ökovernetzungsförderverein	
Address	Herbststraße 21/24-27, 1170 Wien, AT	
Website	www.oekovernetzung.at	
Project Information		
Identifier	2019-2-AT02-ESC31-002496	
Start Date	Aug 1, 2019	
End Date	Jul 31, 2020	
EC Contribution	6,000 EUR	
Topics	Climate action, environment and nature protection ; Equality and non-discrimination ; Education and training	

#### Objectives

The project "Eco-networking - community-building for ecologically, socially and sustainability-politically interested and committed young people" deals with local and global challenges of the present and the future. The activities will address social, environmental, economic, cultural, technological and political aspects of sustainability. The "Ökovernetzungsförderverein", the project executing organisation, would like to offer a set of activities especially, but not exclusively, to young people who are interested in creating a sustainable living environment and a sustainable society. In the project, the association supports and uses approaches such as education for sustainable development, global learning, learning in everyday life and lifelong learning, and mediates between theories and the practice of sustainability.

Specifically, two major networking and continuing education meetings will be organized: the "Öko-Projetkwerkstatt" (= "Sustainability Camp & Project Workshop" in autumn 2019, spring 2020). In addition, a community is set up for which further activities in the area of sustainability are organized, whereby these activiries are planned and realized together with the persons addressed.

Thus, in the context of the project, a low-threshold offer with an accompanying structure of young people for young people will be established, which enables encounters at eye level and self-determined participation. This creates a platform for charitable or non-profit sustainability projects, which reveal exactly this "informality", in which the participants get to know each other, motivate each other, exchange ideas and develop projects together. At the same time, it is about providing a systematic view of challenges in sustainability policy and not separating personal lifestyle issues from entrepreneurial, philanthropic, political or civic engagement when it comes to justice and the future. In addition, it should become apparent that many young people are already working for sustainable development.

#### Impact

The project deals with experiential learning and reflective action belong together for transformation processes (transformative learning) in order to change views / assumptions / practices in interplay with norms and institutions. Above all, community life and cooperative cooperation in different areas of life are addressed. In addition, in the project it is shown that sustainable development must be addressed both at the level of the personal lifestyle and that it needs entrepreneurial, charitable, political or civic engagement. The project team works with the Art of Hosting and Harvesting (AoH) approach. AoH is an attitude that focuses on cooperation and co-creation, and which is a highly efficient way to capitalize on the collective wisdom and ability to self-organize groups of all sizes. For this it is important to address the threesome: brain (thoughts / knowledge), heart (emotion / empathy), hand (practice / lifestyle). Each person has a different approach (or in mixed form): some of the participants are picked up by "brainwork", others by an emotional approach, others are makers (hands-on). The activities conducted in the project should bring together the participants of all these three qualities and thus make it possible to get to know other approaches to social organization and sustainability work. This access will be used as part of the project activities.

The project is not limited to a specific region in Austria, but allows networking of young people who live scattered throughout Austria (and sometimes also internationally). Above all, two multi-day "Öko-Projetkwerkstätten" (= "Sustainability Camps & Project Workshops") serve as a central networking possibility, where there are theoretical and practical inputs, self-organized programs (= empowerment of the participants) and opportunities

for self-efficacy. As part of this process, the participants are encouraged to pass on the learned values and contents as multipliers in their places of action. In addition, at least 10 (half) day activities are planned and organized by the project team of the Ökovernetzungsförderverein together with the participants. This will deepen the exchange as well as the networking between the Sustainability Camps & Project Workshops as well as expand the cooperation and increase the regional impact, e.g. by helping the target groups reach each other in the realization of regionally related projects.

As part of the project, the participants learn how best to network with each other and how to further develop and visualize their own projects. They learn to combine theory and practice and get insights into the UN Sustainable Development Goals, sustainability strategies in institutions, environmental psychology, sustainable management, solidarity living together, political aspects of sustainability and sustainability communication. They can also apply the methods of Art of Hosting used in the project themselves.

Project Title

## worldETHICS

Organisation	Sophie Lukacs	
Address	Griesplatz 8a , 8020 Graz , AT	
Project Information		
Identifier	2019-2-AT02-ESC31-002490	
Start Date	Aug 1, 2019	
End Date	Jul 31, 2020	
EC Contribution	6,000 EUR	
Topics	Culture ; European identity and values ; Equality and non-discrimination	

#### Objectives

The "WorldETHICS" project is intended to support the European Solidarity Corps, which stands for and promotes the values of solidarity, respect for human dignity and human rights, in promoting a society based on equality and fairness. Our project "WorldETHICS" is based on the development of responsibility towards present and future societies. We want to contribute to the (further) development of society in Europe, which should continue to be characterised by the values of the European Union. This means that solidarity between people should be strengthened while respecting their culture and traditions and should be based on mutual understanding and respect. With this project we want to contribute to a respectful society in Europe, where there is enough space for diversity, solidarity, equality, justice and tolerance.

Peer learning should prevail in our project, after all we, as a young team, want to work together with young adults on ethics-related topics and thus make a small contribution to a fairer and more respectful world. Accordingly, we offer people a protected space to deal with ethics-related topics. With this project we want to encourage and enable people to take a change of perspective in everyday situations and to question everyday discussions more critically in order to be able to view and reflect on them from several sides. Critical reflection and empathy are essential for creating a fairer world based on democratic values.

We will discuss and analyse these topics in discussion rounds, which will be built up through content input using multimedia materials. We have set ourselves the goal of demonstrating a successful way of life and thus of imparting goal-oriented solution competence as well as critical reflection skills and conflict management. The discussion rounds offer space for a joint discussion and analysis of the different worldviews as well as cultural, religious traditions and human value settings.

"WorldETHICS" offers a respectful framework to convey information as well as to promote the exchange on ethics-related topics that ultimately affect every human being. Our services are aimed both at children and young people and at educational staff at schools or institutions close to schools, medical staff or public service employees who are confronted with ethical issues on a daily basis. Since "WorldETHICS" deals with social issues that all people ultimately deal with, the target group is very large; after all, it potentially includes all population groups and members.

#### Impact

Our project "WorldETHICS" is based on responsibility towards the present and future society. We want to contribute to the (further) development of society in Europe, which should continue to be characterised by the values of the European Union in the future. This means that solidarity between people should be strengthened while respecting their culture and traditions and should be based on mutual understanding and respect. With this project we want to contribute to a society based on equality and fairness, where there is enough space for pluralism, solidarity, equality, justice and tolerance. The competences conveyed in the project (goal-oriented solution competence, ability to reflect, conflict management, etc.) are intended to strengthen the sense of responsibility with regard to one's own actions, which also have an impact on the development of future societies, in order to encourage the participants to work together peacefully and respectfully.

This project aims to strengthen people's sense of responsibility towards themselves and future generations in relation to social, ecological, economic, political and cultural conditions and to demonstrate the measures and consequences of current individual (and collective) decisions.

Project Title

## Gratitude Graz

Organisation	Gratitude Graz	
Address	Johann Koller Weg 24b Top 7, 8041 Graz, AT	
Project Information		
Identifier	2019-2-AT02-ESC31-002484	
Start Date	Aug 1, 2019	
End Date	Jul 31, 2020	
EC Contribution	6,000 EUR	
Topics	Equality and non-discrimination ; Community development ; Social assistance and welfare	

#### Objectives

The goal of the project is to implement an online game with a strong interaction with urban reality. The aim of the game is to expand and strengthen social cohesion and the relationships of the city dwellers towards each other. This happens through the interactions of the Players during common charitable activities. This common experience space counteracts urban segregation and promotes social peace and Integration.

#### Impact

Existing charitable actions are being increased and new opportunities for action are being created through a platform for neighborhood assistance. Players have more moments of happiness, an increased self-confidence and feel more social security. Origin and social class recede into the background. Joint charitable actions create a new collective identity that counteracts the segregation of society and forms the basis for a humanistic and European value system in a digitized world. Nonprofit engagement should gain more recognition through the game and be perceived as a means to increase one's own happiness.

Project Title

## Womens Rights Awareness

Organisation	Christina Moigg	
Address	Andreas-Hofer-Str. 22/1 , 6020 Innsbruck , AT	
Project Information		
Identifier	2019-2-AT02-ESC31-002495	
Start Date	Aug 1, 2019	
End Date	Mar 31, 2020	
EC Contribution	4,000 EUR	
Topics	Equality and non-discrimination ; Research and innovation ; Human rights	

#### Objectives

The project is addressed at the Tyrolian population with the goal to raise awareness of the violation of women's\* rights in Austria and especially Tyrol. This can be achieved by inviting the local population to reflect on women's\* rights, gain knowledge and engage in dialogue and reflect on measures, which can contribute to a non-discriminative and solidary society. For this, the project activities are carried out in the three centres of population, Innsbruck, Imst and Wörgl, to reach as many Tyrolians as possible.

The project is based on international fundamental- and human rights documents, foremost the European Convention on Human Rights (ECHR), which is considered the most important convention on Human Rights in Europe. The ECHR symbolises solidarity within the European Union, as the member states have agreed on a common catalogue of values which stands for justice, peace and maintaining democratic systems. One of the values defined in the ECHR applies to the protection against discrimination on grounds of sex, race, colour, language, religion, political or other opinion, national or social origion or nationality. The article on "prohibition of discrimination" is used as a guideline as well as legal foundation for the project.

With various methods, the project addresses different forms of discrimination of women\* in Tyrol:

- Intersectional discrimination against women\* of colour at the Tyrolian housing market
- Gender\* pay-gap and the unequal payment of women proven by it
- The violation of women's\* rights regarding the trafficking of women\* for the purpose of sexual exploitation
- Discrimination against queer\* women (women\* that are diverse with respect to gender and sexual orientation)

To achieve the defined objective, the project uses various methods. Relevant data are going to be gained through an online survey, meeting Zones in the centres of population (Innsbruck, Imst, Wörgl) with interactive exercises and an information desk are going to be established, a specialist lecture with a subsequent podium discussion will be organised and a video with concerned women\* is going to be made, to make their voices heard in public space.

#### Impact

The Project's target is to sensitize the population (the civic society as well as political stakeholders) for the violation of women's\* rights and to encourage them - as European citizens - to advocate for the observance of human rights.

The project group wants to increase awareness and acceptance of queer women in Tyrol in order to promote their social inclusion. Women\* that are diverse with respect to gender and sexual orientation must not be discriminated against or treated unequally. Through sensitizing the local society, queer women\* in Tyrol should be empowered.

Furthermore, the project wants to point out that women\*of colour are facing multiple discriminations at the Tyrolian housing market. Political stakeholders and landladies and landlords as well as the civic society will be educated and encouraged to develop countermeasures, in order to establish a non-discriminatory and solidary society.

This document has been generated by the European Solidarity Corps Project Platform. The European Commission is not responsible for the content, which expresses the views of its author(s) only. Page 12 of 57

The illegal trafficking of women is a global as well as local issue. In Tyrol as well, there are trafficked women\* that are being forced to do sex work. This group is not homogenous – a fact, which the Tyrolean population should be made aware of. With an online survey, the project group wants to find out how well informed the Tyrolian population is concerning this matter. The results will be passed on to relevant multipliers to develop information campaigns that are in line with demand. Through educating relevant multipliers as well as the civic public, affected women can be protected more effectively.

Unequal payment for equivalent work is an everyday problem for women\* in Tyrol. The project wants to increase the local population's awareness for this issue, educate and invite to take part in a dialogue and initiate a process of change. The project groups' results are going to be presented to the Tyrolian population in a joint presentation.

Project Title

## Creating Community with LeLa

Organisation	Copoiesis - Kunstverein für kollektive Schöpfungsprozesse	
Address	Fasangasse 35-37/3/4 , 1030 Wien , AT	
Project Information		
Identifier	2019-2-AT02-ESC31-002494	
Start Date	Sep 9, 2019	
End Date	Jul 8, 2020	
EC Contribution	7,410 EUR	
Topics	Community development ; Youthwork ; Inclusion	

#### Objectives

The project Creating Community with LeLa provides the children of a special needs school a safe space, in which they can unfold their creative potential, individually and as a group. To recflect and incorporate the experiences, which emerge spontaneously while being creative, group discussion follow each individual session. The project encourages the children to explore those realms, which have no space within their classroom: the silence, the body, emotions, imagination and philosophy. Delving into these different realms together increases the feeling ot connectedness as well as the solidarity between the school children.

#### Impact

The project aims to transmit specific competencies that increase the sense of self-worth of disadvanteged school children in order to facilitate their overall social inclusion. Mindfullness towards others as well as towards oneself is seen as equally important as non-violent communication, die power of creativity and the intelligence of the human body.

Project Title

# 30 years of children's rights in Austria: the importance of solidarity, democracy and participation conveyed to children and teenagers

#### **Project Applicant**

Organisation	Kinderfreunde Mühlviertel		
Address	Gewerbestrasse 7, 4222 St. Georgen/Gusen, AT		
Website	www.kinderfreunde.cc		
Project Information			
Identifier	2019-1-AT02-ESC31-002402		
Start Date	May 1, 2019		
End Date	Apr 30, 2020		
EC Contribution	6,000 EUR		
Topics	Human rights ; Youthwork ; European identity and values		

This document has been generated by the European Solidarity Corps Project Platform. The European Commission is not responsible for the content, which expresses the views of its author(s) only. Page 16 of 57

#### Objectives

The main goal is to focus on the important issue of children's rights throughout the Mühlviertel, especially because of the 30th anniversary of the children's rights. Other topics such as democracy, participation and solidarity will also be part of our conveyed contents. Against the tendency of developing into a traditional, conservative society, we uphold the European values and we would like to increase the understanding of the importance of democracy. Especially children and adolescents should learn about this topic in a playful way. Inhibitions of thinking about sociopolitical themens outside of these workshops will be reduced and this will strengthen democracy in Austria, as well as in Europe. Likewise, these workshops should provide a counterpoint to the increasingly evolving elbow society. In addition, the local groups in the communities are strengthened, which benefits networking in the region.

#### Impact

The focus lies on the topic of children's and human's rights in the Mühlviertel. All activities will be well perceived in the media, especially at the regional level. In addition, children and adolescents will actively experience values, such as community, solidarity and integration. For this they will learn about children's participation and communication on equal terms and thereby also experience democracy. For adults, opportunities are offered on learning how to prepare contents in an age-appropriate manner and communicate it in a variety of ways and methods. Project meetings increase the exchange within the participating groups and at the same time promote cooperation. In addition, the Roten Falken Mühlviertel gahter a lot of experience in project work. Here, the focus lies on learning from eachother and the concept of "learning by doing".

Project Title

## Square of Sustainability

Ralph Unterlass
Eggenbergerstrasse 48, 8020 Graz, AT
2019-1-AT02-ESC31-002404
May 1, 2019
Apr 30, 2020
6,000 EUR
Community development

#### Objectives

The essential target of this project is to reach out to a large quantity of people of different social groups and to raise awareness about the challenges and necessities of sustainable urban development. It is also a goal that the organisation of the project will further educate the individual members of the team on a personal level.

#### Impact

A desirable concrete result would be that the information brought to the civilian populace through the project will lead to a greater interest in the concepts of spatial development and sustainable urban development, that it would be an inspiration for further campaigns of this kind in the Graz area and that it will be picked up by another group after the end of its currently planned runtime.

Project Title

## Face it, Embrace it - All we need is talk!

Organisation	Service Civil International Österreich	
Address	Schottengasse 3a/1/4/59 , 1010 Wien , AT	
Website	www.sci.or.at	
Project Information		
Identifier	2019-1-AT02-ESC31-002351	
Start Date	Jun 1, 2019	
End Date	May 31, 2020	
EC Contribution	6,964 EUR	
Topics	Inclusion ; Equality and non-discrimination ; Human rights	

#### Objectives

The main objective of our project is to improve social cohesion and solidarity in our community by facilitating a greater openness and acceptance towards its members' diversity. To achieve this, we see urgent need to increase awareness about minority groups and include them in social discourse by giving them a voice. With our project, we will create a safe space, where people are invited to enter into a dialogue with members of discriminated groups, listen to their individual life stories and with this get the chance to challenge their own notions of humans, which are often reduced to harmful stereotypes. In essence, by realizing our project, we want to create a real connection between people, emphasizing shared humanity and with this enable peaceful cooperation among all humans.

#### Impact

Since our main aim is to improve social cohesion in our community, we will enable a dialogue between different sociocultural groups of society. We will create a space where people not only face prejudice, stereotypes and stigmatization but also get the chance to overcome them and appreciate other humans' differences. By realizing this project the participants will not only get a better understanding of social exclusion but will experience a concrete method to facilitate social inclusion, thus implement social change. They will strengthen their social entrepreneurship attitude, create partnerships with relevant stakeholders - thus, set important steps to be active in future civic engagement. Summed up, this project is expecting to have a positive impact by creating mutual empathy and understanding, raise solidarity and facilitate active citizenship among participants.

Project Title

## **Docunights Graz**

Organisation	Dokuabende Graz
Address	Rosenkranzgasse 6/4.2, 8020 Graz, AT
Project Information	
Identifier	2019-1-AT02-ESC31-002354
Start Date	Jul 1, 2019
End Date	Jun 30, 2020
EC Contribution	6,000 EUR
Topics	Employability and entrepreneurship ; Climate action, environment and nature protection ; Community development

#### Objectives

"Dokuabende Graz" is a project, which stands for documentary screening events followed by public discussions with experts, concerning social ills, sustainability and the struggles and changes of our planet due to pollution of land, air, and the ocean, the exploitation of resources, climate change, and also the impact on us humans and on our future way of living. With these events we want to raise awareness and to give people the opportunity to inform themselves, to guide them by presenting solutions on how to make a change and to become active. Furthermore this project acts as a platform for people and organizations sharing the same mindset, supporting each other and working together for a better future.

#### Impact

The project "Dokuabende Graz" aims to reach people in the middle of our society. We want them to rethink about the topics and drawbacks we are presenting at our events. Our target audience should be able to understand these complex issues and further feel motivated to become active and involved themselves. This could mean by organizing own projects or contributing in one, or by talking with friends and family about these topics. Concerning sustainability, we expect that the audience will critically reflect their way of living and adapt if applicable. Furthermore our public appearence as well as our events will help us to get in contact with other local groups, organisations and projects, sharing the same values, to built a network. Together we will be able to organize events with even greater outreach.

Project Title

## The voice of hope

Organisation	Judith Faißt	
Address	Nußbaum 361 , 6952 Hittisau , AT	
Project Information		
Identifier	2019-1-AT02-ESC31-002407	
Start Date	Jun 1, 2019	
End Date	Jan 31, 2020	
EC Contribution	4,000 EUR	
Topics	Reception and integration of third-country nationals ; Culture ; Equality and non-discrimination	

#### Objectives

Even though the voice of each human is unique, singing in a choir proves that we can agree on one song and sing the same note at the same time. We hope to unite children with different backgrounds in this project by rehearsing, singing and dancing songs from different countries, embracing the cultural differences of our globalized world. In a broader sense we hope to distribute the message that it is not a contradiction to be unique and diverse but also united at the same time. By implementing this project we hope to unite children with different backgrounds. Apart from this we hope to improve the language and musical skills of the children and give them a voice. Our goal for the children who participate is that they discover and enforce their love for music, that they have an experience of creating something together in community. When you sing together, it doesn't matter where you're from or if you had a difficult past, when you sing you are united. As we see dividing tendencies in Europe and hear and see nationalist slogans everywhere, we hope that the young human-beings who participate will feel a bit more "European" after our week and are aware that all human beings should be treated equally, no matter where they are from. Our biggest objective is that at the end of the project, the children will be not only be enthusiastic about making music, but also more open-hearted and motivated and curious about other cultures and languages. Each country and each human being has its strengths and beauties. If we are able to spark the spirit of community through music, the "European" spirit, in these 30 children and their close environment and if we're able to initiate a small positive change in their way of looking at themselves and at people from other cultures, we've achieved our goal.

#### Impact

Concretely, the results will be that the children learn songs in different languages and therefore improve their spoken language in English, German and Arabic.

They will also do do sportive team activities and take on responsibility with the aim to develop a hands-on mentality and their sense of solidarity and community. Furthermore we hope that, after the project, they will be aware of the fact that we only have one world and we need to find solutions all together. The children therefore will not only extend their knowledge - about different cultures, musical abilities - but also broaden their horizon and their idea of this world.

We hope to achieve that these children enjoy making music together and discover or enforce their interest in and love for music. But even if music is not their principal passion or talent we hope that this experience makes them start discovering their interests and strengths - no matter in what area. Many studies have shown that singing and making music regularly improves the self confidence of children and therefore we expect that they discover that they can trust and believe in themselves and if they work steadily on something they will improve and hopefully one day achieve their goals.

Our concrete goal is that after the project week and in the process that follows, after appreciating music from different countries with other children from different backgrounds, these children are more tolerant, interested and willing to listen to other people and to appreciate people with different cultural backgrounds.

Finally, we expect out project to have a long-term impact on integration and solidarity. After the week in summer 2019, we want to establish weekly reunions, where the children sing together and practice for a final concert. Meetings of the organization team will be held additionally to discuss and document improvements and to find new ways of addressing the children and to upgrade the existing concept.

Project Title

## Cool guys Graz

Organisation	Verein zur Förderung von Jugend, Kultur und Sport- Verein JUKUS	
Address	Annenstrasse 39, 8020 Graz, AT	
Website	www.jukus.at	
Project Information		
Identifier	2018-1-AT02-ESC31-002313	
Start Date	Jan 1, 2019	
End Date	Dec 31, 2019	
EC Contribution	8,892 EUR	
Topics	European identity and values ; Community development ; Equality and non-discrimination	

#### Objectives

The Afghan youth are all living for several years as refugees in Graz. "Barobax Graz" does not want to reduce their identity to their origin, religion or social situation as refugees. In the foreground is their identity as cool young people, who want to conquer social and public spaces. What does it mean for them to be young and enjoy life as "barobax", which is a slang word that stands for cool teens and youth culture. The accompaniment serves to enable perspectives and activities that would otherwise not be accessible and reachable for them as individuals.

#### Activities

The activities of the group are defined by their role as "citizen journalists". As such, they will conduct interviews, visit institutions, participate in round tables and be available to the media as respondents. Planning, competence building and reflection will be provided in accompanying workshops. The activities are documented via social media, photo documentation and blog entries. At the end, the results of the project will be presented in a public event.

#### Impact

For the participating young people, new social spaces open up and the work serves to strengthen their competences and thus their self-confidence. The common reflection on social and social topics serves political education. For the cooperation partners and the interested public, there are also opportunities to get to know each other better and to establish communication. Stereotypes about certain topics and groups of people (such as integration, asylum, refugees, Afghans, young people ...) can be reconsidered.

Project Title

### Swimmer

Organisation	SUPPORT- Verein zur Unterstützung von Jugendaktivitäten auf nationaler und internationaler Ebene
Address	Keramikstraße 13, 4810 Gmunden, AT
Project Information	
Identifier	2018-1-AT02-ESC31-002292
Start Date	Jan 1, 2019
End Date	Dec 31, 2019
EC Contribution	6,000 EUR
Topics	Citizenship and democratic participation ; Social assistance and welfare ; Inclusion

```
This document has been generated by the European Solidarity Corps Project Platform. The European Commission is not responsible for the content, which expresses the views of its author(s) only. Page 29 of 57
```

#### Objectives

Enable Inclusion and integration by learning swimming!

Wide range learning experience for all participants.

Raised awarenes in the community for the disadvantages and dangers caused by the the fact, being not able to swim

#### Activities

Kick-off and promotional tour launch event Swimm training Course/s Final trips to an adventure spa. Youthpass ceremony/ies accompanying and concluding reporting accompanying reflections and coaching meetings Publication of the results Try to multiply this event and to make it a permanently activity in the region.

#### Impact

New swimmers Teenagers and adults with many new learning experiences and increased competences raised wareness raising for "non-swimmers" in public better perception of solidarity corpus and Erasmus + and more Youngsters involved in Erasmus+ and solidarity corps activities

Project Title

## Language-Labour: Using language as medium for networking in the neighbourhood of Gries

#### **Project Applicant**

Organisation	STADTLABOR GRAZ - INNOVATIONEN FURURBANE LEBENSQUALITAT
Address	GRIESGASSE 40, 8020 GRAZ, AT
Website	www.stadtlaborgraz.at
Project Information	
Identifier	2018-1-AT02-ESC31-002305
Start Date	Mar 1, 2019

End Date Feb 29, 2020

- EC Contribution 6,000 EUR
  - **Topics** Community development ; Territorial cooperation and cohesion ; Equality and non-discrimination

This document has been generated by the European Solidarity Corps Project Platform. The European Commission is not responsible for the content, which expresses the views of its author(s) only. Page 31 of 57

#### Objectives

- Linking the neighbourhood through language and interaction
- Reduction of prejudices and language barriers
- Acquiring a variety of comptences which can benefit the participants in their professional lives as well as strengthen their personalities and encourage them in social learning

- Senior citizens and young people meet each other, in this way there will be prevention of isolation from for example older people

- Establishing and developing an ecological awareness
- Taking responsibility for oneself, the community and the district Gries

#### Activities

- Establishing a weekly Language-Cafe
- Conducting a monthly workshop

- Initiating an AllerLeihladen (a shop in which people can borrow particular items they may need but do not have access to, such as a pot, rice cooker, a bike etc.)

- a monthly excursion in which participants learn aboout the history/personal stories of the district and to meet their neighbours

- Social networking through communal gardening and harvest aid

#### Impact

Due to the Language Cafe the neighbourhood is able to 1) get to know each other better 2) to overcome language barriers and 3) to use cultural differences as ressources. The participants develop a self-consciousness, a feeling of identity and their consciousness for responsibility is growing and becomes stronger, e.g. if the excursions around the district are conducted by different people in different languages. Participants are willing to take responsibility, to organise workshops and to get involved in the organization and publication of the project. Teamwork and actively doing something together brings joy and has a positive impact on people with challenging living conditions (e.g. asylum seeker, single and job-seeking people, pensioners, disoriented people,...)

## Life is a game

Organisation	SUPPORT- Verein zur Unterstützung von Jugendaktivitäten auf nationaler und internationaler Ebene	
Address	Keramikstraße 13 , 4810 Gmunden , AT	
Project Information		
Identifier	2018-1-AT02-ESC31-002299	
Start Date	Jan 1, 2019	
End Date	Dec 31, 2019	
EC Contribution	6,000 EUR	
Topics	Citizenship and democratic participation ; Inclusion ; Culture	

#### Objectives

By playing together and sharing the different gaming experiences we want to achieve an intensive exchange among people which will not happen in normal life. For that people of different ages, from different cultures, countries and social classes are invited to play together. The participants should introduce and share "their" games. A collection of These games will be presented and so accessible to the general public.

#### Activities

Start (tour): the offer will be presented in public (local media, Internet, community events) and in youth organizations, schools, training centers, integration clubs, retirement homes ... etc. presents. Creating info materials, invitations, possibly a Facebook page, etc. and sprinkle them in their social media. Monthly games events, even in changing locations. Creation of a documentation and a game collection

Closing event with presentation of the game collection and presentation of the Youth Pass.

#### Impact

The intensive exchange with people in different life situations promotes understanding and respect.

The marginalized groups (seniors, immigrants) of society can become (again) an active part of society through playing together.

Diverse learning experiences of all involved.

Project Title

## SEE GRAZ

#### **Project Applicant**

Organisation	YOUTH IN PROGRESS Oesterreich Verein zur Foerderung der Eigeninitiative junger Frauen und Maenner
Address	c/o Wolfgang Mizelli, Zollgasse 3/55 , A-8020 Graz , AT
Website	www.yip-info.org

#### **Project Information**

Identifier	2018-1-AT02-ESC31-002307
Start Date	Jan 6, 2019
End Date	Aug 5, 2019
EC Contribution	7,937 EUR
Topics	Equality and non-discrimination ; Inclusion ; Skills development

#### Objectives

AIM: "SEE GRAZ" aims to create a space to reduce existing stereotypes between young [disabled and non disabled] people via using "creation of digital/audiovisual Graz tourist guide specified for blind and visually impaired persons" as tool.

OBJECTIVES: 1. To raise awareness of diversity and its positive impacts in society;

2. To give space, where young disabled and non disabled people can meet and work together;

3. To foster the personal growth, positive interaction, social inclusion, sense of entrepreneurship and active participation of young people from different social backgrounds within the project activities that develops their key competences and addressee issues important to them, using joint vicarious activities, experiences and reflections as a springboard;

4. To raise the awareness of social inclusion and the difficulties some may face with regards to involvement in society, through the creation of tourist guide about Graz for blind and visually impaired people.

The world we live in is not only colorful, but it also comes with many different challenges. We tend to think in stereotypes, although real people are multilayered individuals that cannot be described with a stereotype. The challenge here is to expand our social horizons despite our differences, as space and social structures around us does not give the possibility to do so. Even term "inclusion" is found on almost every corner, unfortunately it is still rare that people with and without disabilities are engaging together in so called "mainstream" activities and in this way could have real possibility to "do inclusion without talking about it". This is the main reason to carry out this project – bring together young people with and without disabilities, learn from each other, "kill" stereotypes and create something useful for local community.

#### Activities

SEE GRAZ foresees to create digital/audiovisual tourist Guide specified towards blind and visually impaired persons, because in touristic area in Graz this group is one of most neglected (based on our research) together with group of young blind and visually impaired people. The guide will include detalized way descriptions, how to reach sightseeing spots, objects, object descriptions in a way, tad the blind or visually impaired person can "imagine" and "see" the object and important information to be aware off, when moving around in Graz. Material is planned in German and English.

#### Impact

1. Digital/audiovisual tourist Guide specified towards blind and visually impaired persons is the main result of SEE Graz.

2. As result can be also foreseen established cooperation between disabled and non disabled young people for a common goal – improve accessibility of their city.

3. The one of expected impacts is reduced existing stereotypes of disabled people and between disabled and non disabled people and encouragement them to take part in such projects or perhaps deciding to organize something similar also afterwards.

4. Impact on people (locals or visitors) who would like to discover city in "different way". None says, that this toursit guide can be used only for the planned target group. It can be used by everyone. There are so many events around, which tend to discover more other senses (like Dinner in dark, etc.). We also see this material as
possibility to discover Graz in a bit different way (how many times we have passed Uhrturm in Graz up on Schlossberg, but really how many times we have been taking time to "see" all the small details it esambles, how many times we have "touched it" to feel the relief or the material?). In this way with our project we just not only want to make our city more accesible, but we also want to make it even more atractive to others and ourselves. 5. Society in general as non – direct beneficiary from this project, because there is promoted mobility and equal opportunities. Disabled people will be more actively involved in society life because of better accessibility to information.

# BeeYoung

# **Project Applicant**

Organisation	Verein zum Zweck des EU-weiten, kulturellen Austausches - wEUnite (wir verbinden)
Address	Moserhofgasse 36/15 , 8010 Graz , AT
Website	www.weuniteaustria.eu

# **Project Information**

Identifier	2018-1-AT02-ESC31-002294
Start Date	Jan 1, 2019
End Date	Dec 31, 2019
EC Contribution	6,000 EUR
Topics	Climate action, environment and nature protection ; Employability and entrepreneurship ; Inclusion

### Objectives

We want to create a space for youngsters, no matter from where they are, to work on a project together and create inclusion and a feeling of solidarity. Moreover, we believe that it is important to raise awareness about our environment and actively work on making it better. We want to give the same opportunities to everyone.

### Activities

We plan:

- courses, workshops, events on local basis, networking

Planned activities are:

- increase the knowledge on the importance of the bee by having workshops in schools

- discuss with older students on bee-keeping and also ask them on their opinion and ideas about it

- include youngsters and migrants and bringing them together with a playful approach and working on something together, in our case working on a hive together

### Impact

- Learning skills that we will need later on.

- Bring together people from different backgrounds and uniting them.
- Decrease bee dying
- increase knowledge and awareness on bees and environment

Project Title

# SDG Ambassadors

# **Project Applicant**

Organisation	Ariane Kolb
Address	Ungergasse 28, 8020 Graz, AT
Project Information	
Identifier	2019-2-AT02-ESC31-002492
Start Date	Aug 1, 2019
End Date	Jul 31, 2020
EC Contribution	6,000 EUR
Topics	Education and training ; European identity and values ; Citizenship and democratic participation

### Objectives

We are convinced that the 17 SDGs (Sustainable Development Goals of the UN) provide a substantial basis for analyzing the complex challenges of our time. They are also extremely valuable for implementing broad-based solutions, which have positive effects for everyone. As part of our initiative as SDG ambassadors, we provide information about the SDGs through events. We also offer workshops to support young people in expressing their own visions and coming up with their own ideas, how a sustainable future can be brought. We support them in the reaching out to their political representatives, presenting them with their ideas for a good, sustainable life for all. Furthermore, we are working on a network for people who are committed to the implementation of the SDGs in Austria in order to exchange ideas, strengthen our initiative and learn from each other.

### Impact

The in-depth knowledge of the SDGs and possibilities of implementing them will strengthen both young people and political representatives to commit themselves to a sustainable future. Young people from the next generations who present specific ideas for a sustainable future can encourage their decision-makers to implement these. In this way, civil society and democratic interaction are strengthened at the local level and in a sustainable way. This paves the way for completing the SDGs until 2030 and a sustainable world. Through the SDG Ambassador network we facilitate a convincing appearance of civil society and by working together we enable stronger advocacy for the SDGs and a good life for all.

Project Title

# Auf dem Diwan 3.0

# **Project Applicant**

Organisation	Society for European-Arab & Islamic-Christian Studies and Exchange Projects
Address	Schenkenstraße 8-10, 1010 Wien, AT
Website	www.ceurabics.com

# **Project Information**

Identifier	2019-2-AT02-ESC31-002486
Start Date	Aug 1, 2019
End Date	Jul 31, 2020
EC Contribution	6,000 EUR
Topics	Youthwork ; Skills development ; Equality and non-discrimination

### Objectives

With the project "Auf dem Diwan 3.0" we want to facilitate contact between refugees from the Middle East and pensioners from Vienna through interactive and guided group activities. Because these two groups are often marginalized or socially isolated, the project enables them to get in touch with each other and actively involved in their neighborhood.

It is assumed that mutual understanding and empathy will be promoted through personal contact and dialogue. Diwan 3.0 would like to give the group a space to deal with different, mostly culture-specific topics such as cultural festivals, languages or music. Learning new things together promotes a sensitive and empathic interaction with each other. The activities provide background information on life in the Middle East, but also on the lives of older people in Vienna. The Diwan 3.0 group meets on a personal level can thus learn from each other.

Two successful projects turnouts, the positive experiences we made, and the specific demand from a Pensioners Club let us start "Diwan 3.0" in fall 2019. Aiming at the establishment of Diwan as a model in every club in Vienna , we want to provide another group of refugees and retired people with the opportunity to meet and learn from each other.

### Impact

We expect "Auf dem Diwan 3.0" to be a contribution in a constantly changing society in order to create a place of encounters, mutual understanding and togetherness.

But not only the young volunteers, but also the elderly one's will benefit. The seniors will be able to broaden their horizon by meeting young people from somewhere else. They get to know someone to listen to and participate in activities.

One other benefit is often forgotten. Having participated in a positive experience with the young migrants, the elderly people strengthen their position against racist bias. They can easier stand up against wrong accusations, victimizations or generalizations - as they themselves have made an experience they can tell people about, they get multipliers.

One of the results of the project we expect is therefore that both groups are actively involved in society, building intergenerational and intercultural bridges and therefore tackling loneliness, exclusion and prejudices.

With "Auf dem Diwan 3.0" hopefully funded as a "solidarity project" we would like to give more elderly people and refugees a supervised place to get in touch. The aim is to ensure that the experiences gained by the participants during Diwan 3.0 have a long-term effect on good cooperation and cohesion in a diverse society or neighborhood. Furthermore, the goal is to establish Diwan as a model on an even broader level and in several clubs in the long term.

To sum up or key reusits and impacts we want to achieve are:

- counteracting social isolation
- supporting the establishment of personal contacts
- improving language skills and social skills
- increase knowledge about people's ideas, wishes, everyday lives, societies, and traditions
- establishing understanding, trust and antagonizing stereotypes and racism

# Easy2Nature

# **Project Applicant**

Organisation	Melanie Gröbl	
Address	Einödfeld, 11 , 8600 Bruck/Mur , AT	
Project Information		
Identifier	2019-1-AT02-ESC31-002408	
Start Date	May 1, 2019	
End Date	Dec 31, 2019	
EC Contribution	4,000 EUR	
Topics	Education and training ; Climate action, environment and nature protection ; Rural development and urban regeneration	

This document has been generated by the European Solidarity Corps Project Platform. The European Commission is not responsible for the content, which expresses the views of its author(s) only. Page 44 of 57

### Objectives

For too long the environment has been suffering under our lavish lifestyle. It is time that we all take action and face the environmental problems head on. We are at a point, where our current decisions and actions define the future: are we going to reverse climate change or will we face irreversible consequences? When society sees itself as a resident of nature, human egoism starts to gets reduced. Modesty is encouraged, manifesting itself a lot of time and in many ways in conflict resolutions. With a common interest we build friendships and collaboration.

With the project Easy2Nature we want to help making everyones everyday life more sustainable. Futher more we want to make the knowledge on the topics of sustainable living, nature conservation and the environment more accessible. We hope to achieve that, trough diverse workshops and a booklet, in which the topics of the workshops and discussions are collected.

Whether you are young or old, poor or rich, no matter where you come from, with previous knowledge or without, everyone can join in, have fun and learn something new together.

#### Impact

The main goal of our project is to show society how IMPORTANT our nature is and to make aware of the impact, that small changes in everyday life have on the environment. We only have one planet and we want our children and their children's children to experience the biodiversity as well. These ways of thinking are not stopped at national borders, instead of that we want to connect people from diffrent countries. We hope that our booklet and workshops will help us to take a step in that direction.

Project Title

# Social climbing project for children, teenagers and young adults

# **Project Applicant**

Organisation	WeClimb - Verein für soziale Kletterprojekte
Address	Rotensterngasse 23/12, 1020 Wien, AT
Website	weclimb.at
Project Information	
Identifier	2019-1-AT02-ESC31-002333
Start Date	May 1, 2019
End Date	Apr 30, 2020
EC Contribution	8,892 EUR
Topics	Health and wellbeing ; Skills development ; Physical education and sport

### Objectives

We want to provide a low-threshold and continuous access to climbing for socially disadvantaged persons, regardless of their gender, their origin and their religion. Climbing courses will be held by specially trained climbing teachers and will contain experiential education. Through this playful approach, the course participants will have the possibility to discover sports like rope-climbing or bouldering, to which they would probably never have had access elsewise. They will learn the fundamentals of climbing safety and basic techniques used for climbing. Moreover, the advantages of climbing will be used to the benefit of single participants and of the whole group. Climbing will be used as a tool allowing the participants to escape from their social isolation and to strengthen their self-confidence.

### Impact

First of all, the participants will get to know a new social environment, which they probably did not experience before participating in such a course. This will change their perception of their surroundings. Thanks to the social contacts created during the course (among the participants and with other visitors of the gym), new acquaintances and friendships will emerge – the fear of talking to someone else will be reduced. After the climbing course, the participants interested in further climbing sessions will still have the possibility to access the gyms in the long run. This will be made possible by cooperation between the climbing gyms, mountaineering associations and WeClimb. Moreover, the participants interested in being trained as climbing teachers will be able to contribute to WeClimb courses in the future.

Concerning the project team, each one of its members will gain knowledge and skills in the area of social projects and entrepreneurship. The group members will improve their decision-making ability, their liability and develop a sense for clear communication. This will have a long lasting positive impact on them, allowing them to organize similar projects more easily in the future. The members of the project team will have a sharper view on the situation of underprivileged individuals or groups of people in Austria as well as in Europe. This will result in a proactive mentality with regard to tackling current challenges on the Austrian, European and global scale.

# Integration and cultural magazine

# **Project Applicant**

Organisation	Carlos Breijo Linares
Address	Moosstraße, 22/5 , 5020 Salzburg , AT
Project Information	
Identifier	2018-1-AT02-ESC31-002306
Start Date	Jan 1, 2019
End Date	Dec 31, 2019
EC Contribution	6,000 EUR
Topics	Inclusion ; European identity and values ; Culture

### Objectives

Working on our own magazine targeted to people that, like us, may feel the lack of information in spanish or in english in the city of Salzburg, will give us the opportunity to face our fears and get the experience and knowledge that otherwise would be hard to acquire. Implementing this project will give us the possibility to develop multiple aspects of our careers. We will be able to be Founders, CEOs, Project, Product and Artistic Managers, Photographers, Social Media & Community Managers, Editors, Assistants, Interns, or volunteers once again.

With our magazine we will show Salzburg to the people that live in the city but is not fluent in the official language (german). Through its pages the audience will find articles about the history and curiosities of the city, photographic reports, interviews, artwork, opinion articles, cultural agenda with the main events in the city...But also they will find stories of real people and a platform where the they can reflect their own ideas. We will like not only to work for impacting in the local community but also to be integrated and work hand in hand with them.

Also, we want to make a printed version as we consider it something different for the new generations in the current information frame where everything is short, digital, superficial, clickbait, in seconds. We want to use the printed format as a hook for some of them and to have the opportunity to work online and offline developing different communication strategies.

#### Activities

The activities that we will carry out can be summarized in five fundamental points:

-Content writting. All the content of the magazine will be chosen among the members of the group, by consensus, always respecting the creativity and ideas of each one.

-Public relations. That includes researching and let our target audience know that we are also a channel of self-expression.

-Photography and illustration. We believe that the image has a strong impact nowadays, sometimes more than the text, so we want to use it.

-Social Media. In order to make our idea more visible, we consider important to follow up and accompany the process through publications on social networks as well as the creation of a web page.

-Regular meetings. That will be the fundamental basis of our work, a good communication between the colleagues is for us the most important requirement that we should meet.

#### Impact

We would like to help the non native german speakers in Salzburg to get to know the city where they are living. In this case we will offer the information in spanish as it is our mother tongue and in english because it is the main language used to conect people from different parts of Europe and the whole world.

Also we would like to give them the opportunity of expressing themselves. Our main goal is to avoid the feeling of being exclude because of the language barriers.

In our minds, this project is a way to take direct action on the society, reflecting values like social and political inclusion; equal opportunity; diversity; active citizenship; gender equality and women's empowerment; support of local social entrepreneurs.

We consider the magazine as a multidirectional communication tool that can create impact in more than one way.

# about bananas'n bees

# **Project Applicant**

Organisation	Verein Mensch sein.
Address	Wastlergasse 4/2, 8010 Graz, AT
Website	https://www.vereinmenschsein.org/
Project Information	
Identifier	2018-1-AT02-ESC31-002284
Start Date	Jan 1, 2019
End Date	Dec 31, 2019
EC Contribution	8,892 EUR
Topics	Inclusion ; Community development ; Reception and integration of third-country nationals

### Objectives

This will be a PEER-TO-PEER-PROJECT in terms of the TOPIC SEXUALITY AND RELATIONSHIPS between girls and boys or young women and men ESPECIALLY FROM MIGRANT AND REFUGEE BACKGROUNDS.

We believe that in a longer term perspective this will also lead to BETTER INTEGRATION via breaking prejudice from both sides – migrants and native Austrians.

We face the situation that there are many young men in our country who came here as young boys, unaccompanied and in a phase in their life where sexual interest is growing, but many prejudice and non-knowledge are around.

The young women on the other hand don't speak about their body and sexuality at all. They simply get no information at all and they also don't do research on the internet because too much shame goes hand in hand with the whole thing.

Many of the young people already took part in educational workshops, but they are held in German - a foreign language for them – from grown-ups and only in group settings.

What is NEEDED is EASY ACCESSIBLE INFORMATION, provided to consume ANONYMOUSLY, their MOTHER TONGUE and from PEOPLE THEY TRUST: from their culture and age.

That is why most of them already "learn" a lot from elder ones from their community, but they themselves often have their "knowledge" from porno videos, prostitutes or even elderly women.

So sex education is very important, and we also want to work on the topic of relationships between men and women.

This will be most trustful via: # PEERs # in their MOTHERTONGUE # WITHOUT BARRIERS and # ANONYMOUSLY

Besides that we want to acchieve:

# Learn about Codes and norms, get aware of them, make them visible, get in dialogue, learn

# Break down prejudice, learn from each other, together, get in contact, build relationships

# Lear nto be aware of their own body, their needs but also their boundaries

# Information about the law

WHO do we want to reach and bring together?

# Young asylum seekers and migrants from both sexes;

# Visitors from youth centers; Pupils

# Young Austrians

# Organisations in the social sector to make them more sensitive for the topic and maybe make up some new cooperations together

### Activities

The very HEART of the project is:

1. Peers go to youth centers, homes for refugees, schools and other places where young migrants and asylum seekers are found

2. They collect the all the questions from the people (anonymously, only by paper)

3. The peers/the project group does some research, works out the questions in mother tongue and make films for a new youtube channel they will implement. Subtitels will be provided in German also.

4. During the time when the group works on the questions and filmst they will further on hold the attention from the visited youngsters via social media and they will also give the opportunity to still take a participative role: Via social media we will also ask the online-community: Who knows what about that? So this is also an opportunity to still take part for the recipients but also to collect possible fake-information and work on that also fort he videos.

5. The project will be coached from a very experienced youth worker, who know a lot about coaching youth projects but also works since years in the field of sex education and refugees.

6. Additionally the project will be published via the whole new built community, mouth to mouth, stickers, supporters (cooperators, the places where the group member work and learn etc. etc.)

"Besides" we will keep the project alive via social media where it is still possible to discuss current questions, but also to keep the followers updated about the project, the research, the making oft he videos etc. Non-project-member will allways have the opportunity to bring themselves active into the project and we will also have the opportunity to work on new information or even "fake-information" we might find in the discussion streams.

#### Impact

The concrete outputs and results will be:

# A Youtube-Platform

# with videos on the topics sexuality and relationships

# from Peer to Peer

# in the mother tongue of the refugees and with German subtitles

# Social Media channels on Instagram etc., that will also be served from Peers

# PEERs, who are accessible at eye level for all questions about sexuality and relationships

As an additional IMPACT we expect:

# BETTER UNDERSTANDING: Both cultures will get to know more from each other, they can better get in contact and build relationships

# LESS CONFLICTS: Through better knowledge there will be better dealing with each other

# LESS NEGATIVE CONSEQUENCES: this will lead to less negative consequences like building prejudice, problems with law, negative experiences on both sides etc.

# LESS UNWANTED PREGNANCIES: through better and easier accessible information from people from their community, from a background they know, which they trust, on eye level.

# MORE SATISFACTION and a living together in harmony for all involved persons and communities.

Project Title

# MOVED ANNENVIERTEL

# **Project Applicant**

Organisation	Verein Stadtteilprojekt ANNENViERTEL
Address	c/o MANAGERIE, Mariahilferstraße 30 , 8020 Graz , AT
Website	www.annenviertel.at
Project Information	
Identifier	2018-1-AT02-ESC31-002280
Start Date	Jan 1, 2019
End Date	Dec 31, 2019
EC Contribution	6,000 EUR
Topics	Community development ; Inclusion ; Equality and non-discrimination

### Objectives

Our aim is to improve the coexistence of different people with different social conditions and their associated communication. It is important to us to make the realities of life of individuals and groups visible to others and thus to make "empathy" and a view of the "other" visible. This is accompanied by the creation of networks and relationships to support and each other, also bottom-up and solidarity, especially in times like these, where political networks are often dismantled for reasons of economy, and people thereby fall through the social "net".

### Activities

Our project MOVED ANNENVIERTEL has been offering a free offer for ALL for some years now and is getting richer each year to people who offer something sportive to other people on a voluntary basis. However, this requires good application, communication and organization, for which we need basic funding.

Plans include the expansion of formats such as "Morning Disko - Dancing under Plants", "Soft Morgenturnen with Kirsche Kristin", "Yoga for ALL" by and about 10 different

Yoga teachers with up to 100 participants per yoga session, "Pilates for ALL", "Table Tennis Tournaments", "Sport Fishing - Techniques and Theory"

with Remko Berkhout, and much more. Other formats are planned for 2019, such as Volleyball, Chinese martial arts, maybe Mindfulness workshops, etc.

These offers are organized, coordinated, advertised, supervised and require infrastructure by the Verein Stadtteilprojekt ANNENVIERTEL

Sound system, headset, table tennis racket, etc. provided. They are held by the ANNENViERTLERN themselves, focusing on our

Report alerts. They are free and accessible to ALL!

### Impact

The inhabitants of the district ANNENVIERTEL are strengthened in terms of "their own right to city", they are strengthened as women, they build their own network, they learn different sports, such as yoga, table tennis, dancing, etc., they have fun in their spare time and are active sporty,

In addition, the target groups feel that there is "someone there", they are not "all the same" and the neighborhood is not "neglected anyway".

The Volksgarten in the district ANNENVIERTEL has also been a social hotspot for several decades. Especially children and adolescents with and without a migration background are there after school and on vacation, but also young adults, families of all ages, backgrounds, religion and social background. The aim is not a crowding out of certain people and groups BUT an integration to promote communication among different groups of people and thus also to sharpen the gaze to the "other", to network, to make friends, to strengthen girls and women and simply to offer relationship.

The Volksgarten is also known for a "drug dealing problem". Often these are people who are socially and socially excluded and have few prospects or opportunities to find work in the labor market. We also involve you in our activities, create an eye-to-eye encounter and promote a consistent and continuous offer with our activities and thus a certain amount of security.
